

CONSTRUCTION EQUIPMENT

THE DEEP IMPACT COMPACTION ROLLER

SMITH

CONSTRUCTION

The very best of British

KEY FEATURES

- Compacts the ground up to 4 metres deep
- The roller has a polygonal shape drum which sends vibrations into the ground as it travels across land
- 50% more performance compaction
- Integrated computer records details & measurements of the ground strength and compaction achieved
- Achieves 35% greater effective depth
- High mobility
- It rolls & vibrates at the same time
- Combines maximum surface performance with minimum cost per M³
